PROJECTS

Personal Portfolio Website

- Built and deployed a personal portfolio using HTML, CSS, and JavaScript, hosted on Vercel. The website showcases skills, projects, and a contact form.

calculator App

- Modern calculator application developed with React featuring responsive design and interactive functionality.

ShinePro – Car Care Landing Page

- Developed a responsive landing page for a car care products brand using HTML and Tailwind CSS. Focused on a clean design, product presentation, and clear call-to-action buttons to increase conversions.

Shorter Links App

- Developed a web application using JavaScript and an API to shorten long URLs into simple, shareable links. Implemented responsive design and a clean user interface.
